Rev. v2a -220706

### Warranty Policy

During the warranty period, your purifier can be replaced, refunded or maintained according to the following policy:

1. No reason to return or exchange the product within 7 days from the receiving date. The return postage for non-quality problems will be the responsibility of the customer and postage for re-delivery shall be borne by the merchant. If you have invoices, additional gifts or accessories, please send them back together.
2. Within 15 days from the date of receipt, if the product fails to perform, and the product and package are complete and there is no apparent damage, you can choose to exchange it for the same model or get free maintenance. After testing and confirming the unit is working properly, this warranty will remain in service according to the following after-sales service time: product quality problems within 12 months from the date of purchase receipt, excluding any human factors.
  1. In the event of repairs/replacement of any part of the unit, this warranty will thereafter remain in force only for the unexpired period of the warranty. Moreover, the time taken for the repair/replacement and in transit, whether under the warranty or otherwise, shall not be excluded from the warranty period.
  2. The company's obligation under this warranty shall be limited to repair or providing replacement of part only. The maximum claim, if entertained by the company, will be subject to the maximum retail price of the product purchased or the purchase price, whichever is lower.
3. Accessories are not covered by warranty.

### Warranty Policy (Continued)

What is not covered by the warranty:

1. The product has been tampered with, repaired or modified by non-authorized personnel.
2. Damage (accidental or otherwise) to the product that does not impact the product's operation, such as and without limitation to rust, change in color, texture or finish, wear and tear, and gradual deterioration;
3. The damage of products caused by accident, abuse, natural disaster, intentional or accidental misuse, fire, neglect or improper maintenance, and use under abnormal conditions;
4. The products exceed the warranty service period as stipulated by the company;
5. The original serial number is removed, obliterated or altered from the product;
6. Packaging and accessories attached, services and additional configurations other than those promised by the salesperson;
7. User Manual instructions were not followed.

## Features

- 12 Million Anions
- Ozone Sterilization
- 1800mAh Lithium Battery
- Dust/Smoke Elimination
- Highly Efficient Purification
- USB Output
- No Filter Needed
- Ultra Silent
- Aluminum Alloy

## Advanced Oxidation

Activated oxygen (ozone) attaches itself to contaminants at the molecular level, destroying them.

## Ionization

Negatively charged ions reduces irritating particles from the breathing space.

## USB Output

With the USB output charging function, you can still charge your electronic devices while the unit is plugged into the vehicle's USB port or with the cigarette lighter port and USB adapter (not included).

**NOTE: Insure your USB Power Supply is rated at 2A to adequately operate and charge the unit.**

## Full Cobalt Lithium Batteries

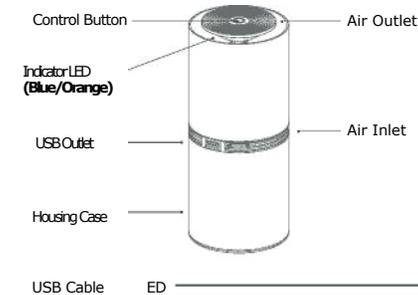

The police equipment-grade full cobalt lithium batteries are designed to endure through abnormal conditions, such as overcharging, over-discharge, high temperatures, short circuit, etc. Designed with multiple protections and has a long-lasting battery life.

## Specifications

Model .....	G01.0
Input .....	5V 2A
USB Output .....	5V -1A
Negative Ion .....	12x10.PCS/cm.
Ozone .....	100mg/hr
Coverage .....	<10m.
Cell Capacity .....	1800mAh
Noise .....	<27dB
Size .....	65 x 153mm
Material.....	Al Alloy + ABS
Weight .....	351 g

## Package Includes:

GO Portable Air Purifier, USB Cable, User Manual, Warranty Card

CE FCROHS Z

## Operation

### Ionization Mode (Blue LED)

- Short Press to turn ON/OFF

### Ozone Mode (Orange LED)

- Press 3 seconds

### To Operate:

Press the control button for 3 seconds to engage in the automatic "shutdown" mode. An orange light will be on and the ozone production will automatically shut down after fifteen minutes.

### Charging your unit:

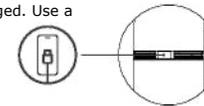

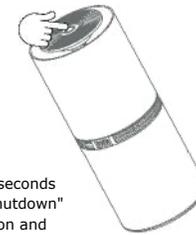

The orange light will flash when the battery is low. When charging, the blue light will flash and will stop flashing when fully charged. Use a USB power supply rated at 2 amp to operate and charge the unit.

### USB Outlet:

Once the power is on, the USB port outputs 5V-1A power, allowing you to charge your portable electronic devices. **Insure your USB Power Supply is rated at 2A to adequately operate and charge the unit.**

### How to use:

For use in the car, place the purifier into a cup holder, plugging the USB power cord into your car's USB charging port or, with an adapter, into the car's lighter port. Other uses for this unit can include places such as your desktop, refrigerator, wardrobe, kitchen, bathroom, etc.

## FAQs

### Q: Will this fit my cupholder?

A: This unit will fit almost all cup holders in your vehicle. The diameter of the cup holder should not be less than 70 mm.

### Q: Do I need to replace the NEPA filter?

A: The negative ions effectively eliminate dust, smoke, pet odors, pollen, bacteria and more. There is no need to replace the filter and there is no maintenance required, saving money on filter replacements.

### Q: Will it drain my car's battery?

A: The simple answer: no. The cigarette lighter in most vehicles stops when the car is off, and the purifier won't work without power. It will run independently when in battery mode.

### Q: Is ozone harmful to humans?

A: A high concentration of ozone can be an irritant, especially to those with respiratory issues. Avoid inhaling excessive levels of ozone which is indicated by a strong pungent smell similar to chlorine. The ozone concentration in the car can be reduced by turning on the car ventilation system using the outside air intake mode. Ozone has a half-life of 20 minutes and will be completely broken down within two hours after the unit shuts off.

### Q: How long will the purifier last?

A: The life of the unit is 20,000 hours. After 20,000 hours, the level of negative ions and ozone gradually decreases, but the unit will still work.

### Q: Can the air purifier continue to work after parking?

A: The unit contains a 1800mAh lithium battery, and is able to work independently or when connected to the power supply.
