Google Chrome problems in SustainEngine iframe I am experiencing problems in the SustainEngine this weekend. The green bar appears at the top of the page, but no ad is shown when I click. If I check the source in the browser, I see that nothing appears to be coded for the SustainEngine. If I view the source on another host such as Firefox it works fine. If I add the iframe to the HEAD instead of the bottom of the page it also does not work. Any idea how to fix this? You can use the pop_up template for the campaign search to get 3 possible results from the last 90 days, a week, or a day Hi Isuck, I am in the process of having this fixed as we speak. Our website is under constant and constant attack but I have been able to get to some of the problems we are experiencing on the server side. I will update the post later today if all goes well. Regards I'm thinking of using iframe for my site on Search Engine site. As above, I see green progress bar at the top of the page. That being the case, how do I capture the text when the overlay is clicked? When the overlay is clicked, it will submit a form to the SustainEngine submit the form and you get three possible results from the last 90 days, a week, or a day. How would you approach the issue of clicking on the green overlay? Do I need to capture the click event and submit my own form? Hi Isuck, We found the issue, it's being fixed as we speak. There was an issue on our side that was preventing the overlay from being clicked and that is why it was working fine from other sources such as Firefox. Regards How do you get to the form that is created after the click event? Can I append it to the target page? Announcing the 2018 Susan G.
