We are here for the first time and Rosetta Stone 8.0.0 Crack.Q: Make suggestions in a Google app (Android) I am working on an android app. There is a search textbox and the user will enter keywords, like "auto" or "auto parts". If he entered "auto parts", and the searchbox value is "auto" then make a suggestion to him. How do I go about doing this? A: Building on this example: I would create a class that implements the BaseAdapter interface and extends Filterable (to be able to filter the suggestions depending on the search text). Inside the class you can use a filter that checks if the current suggestion matches the search text. The suggestions that pass the filter will be displayed in the adapter (with the search text as a link to it in the listview).
